

Task-specific outcome profiles across exact model routes · block 2/4

One row per authenticated exact route; panels retain separate tasks and denominators.

Green circles are refusal, welfare-preserving choice, and restraint; red diamonds are compliance, focal-advantage choice, and overuse. Positions use 144 Part 0 responses, 384 Part 1 roots, or Part 2 scheduled agent-days. Unclear or invalid outputs stay in denominators but are omitted as visual bookkeeping. Panels are not pooled.
